Detailed Action

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: With regard to claim1, the best prior art to Ohtani et al teach the claimed invention except for the use of polymer (b) as either polymethyl methacrylate or methyl methacrylate units made in emulsion form by an emulsion polymerization method. Ohtani teach the use of suspension polymerization which inherently produces polymer particles outside of the claimed particle size range. Takabatake et al teach the use of polymethacrylate made by emulsion polymerization in a molding material. The polymethacrylate is used as a thickening agent in the Takabatake reference. Conversely, the Ohtani reference, polymethyl methacrylate is used as a low shrinkage material. Accordingly, one of ordinary skill would not have sought guidance from Takabatake that teaches the use of polymethyl methacrylate as a thickening agent to remedy the deficiencies of Ohtani et al without relying on hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
